

PROJECT UPDATE

From Westlake Management Association

March 14, 2016

This notice is to update our neighbors on the progress of our much needed well located on Triunfo Canyon Rd. We have successfully drilled the well to a depth of 800 ft. and have found a moderate amount of water which will be available to help maintain the lake during the upcoming hot summer months.

Thank you

... for your patience and support during the long period of drilling. We are awaiting final permit approval and electrical connections which should be completed soon. Below is a current photo of the site. As you can see, the footprint of the well site has been reduced to the 10 ft square safety barrier shown. This barrier will be removed as soon as the well and pump are functional. WLMA thanks its neighbors for partnering with us on this critical water project to maintain the beauty of our wonderful lake.
